

Project Information Management System (PIMS)

Orbital Express

Project Information Management System

- Web Applications and Project Management
- Project Information Management System
- Software Demonstration
- Summary

Web Applications - What Are They?

- Web browser as client
 - No client software to distribute
- Web server as application
 - Single update point
- Database as repository
 - Single data repository
- Examples

eBay

Amazon

Fidelity

Google

Flickr

Craig's List

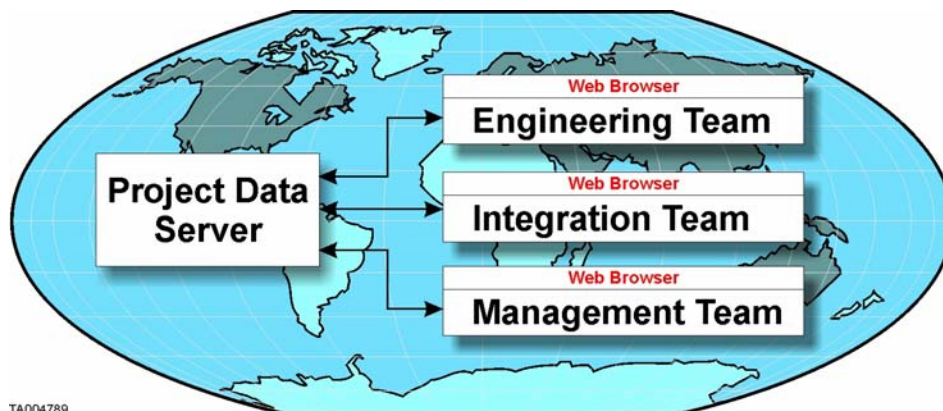

"Without a doubt, web-based applications are critical components of business success. Not only has the importance of web applications skyrocketed, but the complexity has also grown as the technology matured to deliver serious business services."

Hurwitz Group

Project Management Web Apps

- Project functions are web applications
- Project information in central location
- Clients: web browser, email programs
- Email notifications, file transfers
- Can contribute to proposal success
- Can be key to project success

TA004789

Project Functions

- Action Item Tracking
- Risk Management
- Non-Conformance Reports
- Project Logbook
- Checklist Management
- Custom Tracking
- Document Management
- IEEE Parts Tracking
- Scheduling
- Manufacturing Planning Sheets

Project Information Management System

P I M S =

- All functions in one web application
- Module-based permissions
- Secure access
- Data in one location

Project Functions

- Action Item Tracking
- Risk Management
- Non-Conformance Reports
- Project Logbook
- Checklist Management
- Custom Tracking
- Document Management
- IEEE Parts Tracking
- Scheduling Interface
- Manufacturing Planning Sheets

PIMS – Software Demonstration

Software Demonstration

PIMS Feedback

- Excellent feedback from NASA review panels and teams
- “Much more efficient than chasing paper”
- “Critical” for taking care of action items from design reviews
- Cited as a contributing factor in two winning multi-million dollar proposals
- The springboard for the development of more web applications

PIMS Pricing

PIMS is currently available at the following rates:

Subscription	Cost / Year	# Users	Feature Priority ¹
PIMS Subscription 1	\$2,000	7	Low
PIMS Subscription 2	\$5,000	20	Medium
PIMS Subscription 3	\$10,000	unlimited	High

Feature Priority¹ – The priority for additional requested features. These are implemented as part of the PIMS software release cycle.

Project Information Management System

- **Web applications make life easier**
- **Web apps can also help project managers**
- **PIMS is a centralized Project Mgmt Web App**
 - Subscriptions available
 - Promotional subscriptions (some conditions apply)
 - Online demonstrations available, at conference or via webex
 - Come visit our exhibit - drawing for Starbucks Gift Certificate
